ABOUT US

Streamlining clinical trials across Australasia

Momentum Clinical Research is the largest network of fully integrated clinical research sites across New Zealand and Australia with over 20 years' experience delivering phase Ib to IV clinical trials.

At Momentum, we strive to accelerate medical research by introducing a more streamlined approach to clinical trials. Our unique proposition of a single point of contact serving multiple sites across the region ensures seamless coordination and communication, resulting in faster and more efficient trial completion.

The Momentum Experience

Our scale and centralised efficiency offer a distinct advantage to our partners. But it's the experience of working with us that really sets us apart. We're transparent, we follow through, and we make the process feel personal, positive and engaging.

We believe the clinical trial journey can and should be both effective and enjoyable—for our research partners and our participants. It's a privilege to contribute to the advancement of medicine, and we approach that responsibility with both gratitude and a strong sense of human connection.

Why sponsors and CROs worldwide partner with Momentum

- Accelerated Start Up
- Reliable Recruitment
- Streamlined and Integrated Process
- Diverse Expertise and Capabilities
- Highest Quality Data and Compliance

Accelerated Start Up

- Quick response to feasibilities 48hrs
- Fast Ethics submission within 7 days
- Simplified ethics approval 4–6 weeks
- Established Maori Consultation Process
- Rapid site selection service

New Zealand and Australia have become a sought-after region for clinical trials due to short regulatory and ethics approval times. Our teams are experienced in delivering streamlined processes, including a 48hr response time to initial feasibilities and fast-tracked ethics approval of four to six weeks.

Reliable Recruitment

- A diverse representative database of 50K potential participants
- Dedicated in house recruitment, participant experience and marketing centre
- High participant retention with industry leading patient engagement program
- 14 geographically diverse and dispersed sites across NZ and Australia

Patient recruitment remains the biggest challenge in clinical trials and Momentum is setting a world leading standard by leveraging years of experience in marketing and patient engagement strategies to meet this challenge.

Through our dedicated inhouse recruitment and participant experience centre, we've built a comprehensive participant database, and patient retention program, enabling us to deliver high-quality study data quickly and efficiently.

Streamlined and Integrated Process

- A single contract and budget for multiple sites across the region
- Centralised functions for accelerated start up, recruitment and execution
- Seamless coordination and oversight of trials at multiple sites across the region
- Dedicated team for consistent communication and fast response

By partnering with Momentum, sponsors receive a dedicated contact for consistent communication throughout the trial process, enabling partners to make timely decisions and provide regular stakeholder updates. Our end-to-end support system allows for efficiency during the intricate clinical trial journey to ensure sponsors and participants experience consistent, first-class care.

Diverse Expertise and Capabilities

- 20 years' experience of proven delivery of high-quality data
- Led by experts with extensive sponsor and CRO experience
- Over 200 Phase Ib – IV clinical trials delivered
- Expertise and Infrastructure to conduct a diverse range of therapeutic trials
- Dedicated to providing a highly ethical patient first environment
- World class facilities equipped with latest medical technology

Over the last two decades, Momentum's key personnel have evolved into a team of the most experienced investigators and researchers across Australia and New Zealand.

Our network of 14 sites bring an unparalleled diversity of research experience and therapeutic capabilities. We can facilitate individual trials to be conducted across multiple sites, resulting in a consistent trial outcome.

Highest Quality Data and Compliance

- Dedicated quality officer ensures each trial complies with ICH GCP
- Internal Clinical Governance Committee
- Proven culture of continuous improvement
- RealTime CTMS software enables remote monitoring and faster response to queries

Momentum allocates a dedicated quality officer to all clinical trials, to ensure they comply with the International Council for Harmonisation (ICH) E6 Good Clinical Practice (GCP) and the collection of high quality and credible data. We take pride in upholding the highest clinical trial standards with our GCP trained teams and IATA certified staff.

PARTNER WITH US

Clinical Expertise Experienced Leadership

In the complicated world of clinical trials, we strive to make things easy using our decades of experience and size to our advantage — and yours.

Alongside experienced clinical leadership, our dedicated centralized support team enables seamless coordination of clinical trials across multiple sites in the region. Experience faster starts, effective recruitment, a streamlined trial process and consistent delivery of high-quality data and patient care.

RESEARCH EXPERIENCE & EXCELLENCE

We deliver people-centred research & clinical excellence at scale, making a meaningful, positive impact in people's lives

Recent Study and Recruitment Highlights

- Thought Leadership: Numerous investigators with published studies in leading international peer-reviewed journals.
- Early adopter of new clinical trials infrastructure – RealTime CTMS and eSource, Davana Propel.
- Achieved the first in world participant for several studies due to fast start up process.
- Established high recruiting sites for multiple phase II and III studies including:
 - HSV study 2024
 - Knee Osteoarthritis study 2023 (top recruiter)
 - Weight loss, diabetes and CVOT studies 2023–2024
 - Flu, Covid and other specialised vaccine studies 2020–2023
 - Alopecia and dermatitis studies 2022–2024
- Regular involvement in Phase Ib clinical trials
- Pioneering the evolution of HIV drug treatment since the early 1990's
- FDA inspection in Feb 2024 with no action indicated (NAI)

Therapeutic Expertise

General Medicine, Respiratory medicine, Endocrinology, Cardiology, Gastroenterology, Dermatology, Rheumatology, Immunology and Allergies, Men and Women's Health, Weight Management, Diabetes and Metabolic Disorders, Coeliac Disease, IBS, Chronic Pain, HIV, Infectious Disease, Mental health, Lifestyle Diseases, PK Studies, Vaccine Development, Healthy Participant Studies.

Our State of the Art Facilities Provide

- Spacious clinics can accommodate multiple participants at a time
- Comfortable consultation rooms for enhanced participant experience
- Multi-purpose rooms adaptable to study requirements
- Special facilities for prolonged participant visits
- Private fully equipped examination rooms
- Fully secure and equipped laboratory and pharmacy rooms
- On-site laboratory for processing biologic samples
- RealTime CTMS platform to enable remote monitoring
- Secure controlled document storage for commercially sensitive and blinded information
- Space for onsite monitoring visits
- Easy access via public transport
